

AngusONE Genetic Evaluation

Please note that the EPDs listed in this sale catalogue are the product of the Canadian Angus Association AngusONE Genetic Evaluation. The AngusONE genetic evaluation for all Canadian Angus cattle, Red or Black, and American Angus cattle, was launched in 2018.

There are a lot of advantages to the AngusONE genetic evaluation, including the combined Canadian Angus Association and American Angus Association data which gives the ability to calculate more accurate EPDs. Additionally, the Canadian Angus Association and American Angus Association genetic evaluation includes almost 1 million animals that have been genomically tested. AngusONE has allowed the expansion of genetic evaluations and brings EPDs for new traits that are priorities for the industry and economically relevant.

The AngusONE breed averages are shown below to help you adjust to the new base. Percentile rank graphs for each animal are easy to use and available at www.cdnangus.ca. The right EPD for you will depend on your cow herd, your management, and your breeding goals. For more information on using EPDs or please contact the Canadian Angus Association at 1-888-571-3580 or kdevani@cdnangus.ca. For more information about the genetics offered in this catalogue and what might best suit your breeding needs please contact the seller.

Breed Averages Table - Released January 2021

	Calving Ease	Birth Weight	Weaning Weight	Yearling Weight	RADG	DMI	Scrotal Circumference	Docility	Claw	Angle	Carcass Weight	Marbling	REA	Fat	HPG	Mat. Calving Ease	Milk	Mature Weight	Mature Height
